

SADI MAHMUD FAHIM

FULL STACK WEB DEVELOPER (MERN STACK)

Chattogram, Bangladesh • sadimahmud125@gmail.com • 01869158262

CAREER OBJECTIVE

Forward-thinking Computer Science & Engineering senior passionate about building high-performance, user-centric web applications. Equipped with robust technical expertise across the MERN stack and hands-on experience developing end-to-end e-commerce engines, media platforms, and complex deep learning workflows. Highly motivated to collaborate with dynamic engineering teams to write clean, optimized code and deploy scalable architectural solutions.

TECHNICAL SKILLS

Frontend	JavaScript (ES6+), React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend & Database	Node.js, Express.js, RESTful APIs, MongoDB, SQL
Tools & Cloud	Git, GitHub, Postman, VS Code, Vercel, Netlify
Core Foundations	Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Software Architecture

DEVELOPMENT & ENGINEERING PROJECTS

FlixStream — Full-Stack Netflix Clone	MongoDB, Express, React, Node, TMDB API
- Integrated external TMDB API endpoints to dynamically populate synchronized horizontal content categories. - Engineered custom frontend state management algorithms to handle persistent real-time user watchlist additions.	
Athletics Gear & Jersey Hub — E-Commerce Engine	MongoDB, Express, React, Node, Tailwind CSS
- Developed structural multi-criteria search structures enabling smooth real-time inventory adjustments and catalog filtering. - Built clean backend API routing to secure shopping cart tracking models and itemized parameter persistence layers.	
BookBee — Web Bookstore Platform	MongoDB, Express, React, Node, Tailwind CSS
- Architected interactive components featuring dynamic sticky action navigation menus and seamless category indexing. - Implemented complete administrative panel logic to streamline backend catalog modification routes and inventories.	
PulseFit — Gym Management System	React.js, Node.js, Express, MongoDB, Bootstrap
- Built structural scheduling tables for managing active workout calendars and customized training appointment loops. - Created localized client dashboards monitoring membership parameters, routine tracking modules, and billing states.	

RESEARCH & MACHINE LEARNING PROJECTS

Satellite Image Terrain Classifier	Python, TensorFlow, Keras, CNN, OBIA
Fused Object-Based Image Analysis (OBIA) methodologies with customized Convolutional Neural Networks (CNN) to drastically increase classification accuracy across heterogeneous terrain and satellite remote sensing maps.	
Automated Medical Image Analysis System	Python, Deep Learning, DenseNet121, CNN
Leveraged DenseNet121 and CNN frameworks to optimize prediction rates and heavily minimize false negatives in medical diagnostics.	

EDUCATION

B.Sc. in Computer Science and Engineering (CSE)	2022 — 2026
International Islamic University Chittagong, Chittagong, Bangladesh	
Higher Secondary Certificate (HSC)	2020
Bangladesh Navy School and College, Chittagong, Bangladesh	
Group: Science • Result: GPA 5.00 out of 5.00	
Secondary School Certificate (SSC)	2018
Nizkunjara High School, Feni, Bangladesh	
Group: Science • Result: GPA 5.00 out of 5.00	

EXTRACURRICULAR & RESEARCH ACTIVITIES

- **Technical Presentations:** Successfully structured and presented a comprehensive 18-slide core architectural breakdown of deep learning models and testing results to university faculty evaluation boards.
- **Analytical Problem Solving:** Actively completed advanced programmatic and logic modules focused on coordinate geometry, advanced wave/classical physics, and structural calculus during coursework.
